## Summary of Operational and Planned Oceanographic Observation Programs

### ARGO

First deployment June 2010 presently one active.

<http://nettuno.ogs.trieste.it/sire/medargo/active/index.php>

To see latest status of all floats go to: <http://wo.jcommops.org/cgi-bin/WebObjects/Argo.woa/wa/default> and select Monitoring and Countries.

### Sea Level

23 sites listed at GLOSS (2010) <http://www.psmsl.org/data/obtaining> and 5 real-time at UNESCO/IOC (Katamata, Kasteli, Katakolo, Peirias and Syors).

<http://www.ioc-sealevelmonitoring.org/list.php>. Gavdos, Patras, Thessaloniki, Spanoxou Lefka, Kassiopi Corfu and the Technical University of Crete are GPS positioned and posted at <http://www.sonel.org/spip.php?page=cgps>

### **SST & Sea State**

[http://www.poseidon.hcmr.gr/waves\\_forecast.php?area\\_id=aeg](http://www.poseidon.hcmr.gr/waves_forecast.php?area_id=aeg)

### **Moorings**

Poseidon Buoys <http://www.poseidon.hcmr.gr> Two sites measure salinity and temperature at depths 20-1000 m, chlorophyll-A and light attenuation at 20-100 m, dissolved oxygen at 20-100 m, current speed and direction at 20-50 m, radioactivity and radiance – irradiance. All buoys are equipped with sensors that monitor air-pressure, air-temperature, wind speed and direction, wave height period and direction, sea surface salinity and temperature and surface current speed and direction.
